

Information on prevention and management of waste batteries

(a) Free take-back of waste batteries at offline stores and EU municipal public collection points.

(b) Prohibit disposal with household waste; store damaged batteries separately, no manual disassembly.

(c) Crossed wheeled bin symbol means mandatory separate recycling; Pb/Cd/Hg indicate heavy metal content.

(d) Improper battery disposal will cause soil and water pollution and health risks.

(e) Waste batteries can be reused for energy storage and raw material recycling.

(f) EPR recycling costs are included in product prices, covered by the producer.
